Eliot Hsu

(408)-642-8396
eliothsu@berkeley.edu
7739 Robindell Way, Cupertino, CA

Education

- **UC Berkeley EECS Junior (May 2020)**
- **3.76** EE/CS GPA, **3.63** Overall
- Regents' & Chancellor's Scholar
- MVHS 4.0 U/W GPA
- 36 ACT, 2350 SAT

Courses

- CS170: **Algorithms***
- CS61B: **Data Structures***
- CS61C: **Comp. Architecture***
- CS184: **Comp. Graphics**
- CS168: **Internet Architecture****
- CS188: **Artificial Intelligence****
- CS61A: **Comp. Programs***
- CS198: **Web Design**

*: Top 5 Class Project Performance
**: Currently Taking (Fall 2018)

Experience

Automeet Event Scheduler (May 2018-)

- Cross-platform iOS/Android app written in Dart for Flutter
- Automatic scheduler using user-inputted weekly timeslots
- Backend written in JavaScript for Node.js environment
- Google Firebase BaaS; Algolia search integration
- Swift 4.0 and Java platform-specific code
- Alpha testing Fall, applying for accelerator Spring 2019

Software Internship 802 Secure (May-Aug. 2017)

- Designed, wrote, tested, and shipped production software
- Processed WiFi capture (.PCAP) data for cloud analytics
- Wrote startup scripts for Ubuntu-based client machines
- Built and maintained Docker images for company usage
- Programmatically analyzed Wireshark network data
- Built and updated Ubuntu 16.04 thin client environments

- Recruited, interviewed, and developed professional skills

Bearmax CalHacks Winner (Nov. 2016)

- Chatbot; diagnoses diseases from symptom descriptions
- Built on Facebook Messenger with IBM Watson NLP
- Wrote integration scripts across Heroku, API Medic
- Free access to healthcare knowledge, actionable advice
- Won Best Health Hack and Best Beginner Hack

CS170 Wizards NP-Complete Solver (Oct-Nov. 2017)

- Wrote an efficient solver for Betweenness (NP-C)
- Utilizes Simulated Annealing to converge on solution
- 98th percentile final grade overall in algorithms class
- Scored in top 5 projects in a ~650 person class

Hearthstone Deck Predictor (Oct. 2017)

- Processed a public dataset into a basic n-gram model
- Uses Python JSON parsing for manual data analysis
- Predict opponent's moves based on recorded games
- Output predictions during live online matches

Skills

- Python, Java, C, C++, AHK, SQL
- Dart, Android, iOS / Swift, Flutter
- HTML, CSS, JavaScript, Node.js
- Unix, Windows, MacOS
- Git, Shell/Bash Scripting
- Algorithm Design, Scripting
- Accessibility, Optimization
- Photoshop, Illustrator, InDesign

Hobbies

- Noteworthy A Cappella (UC Berkeley)
- Building Desktops (4 from-scratch builds)
- Photography, Video Editing
- Reading, Writing (wrote a novel)
- Semi-pro Overwatch team (Top 3% in world)
- French Horn (7 yrs., CYS Senior Orchestra)
- Personality Psychology - Attachment Theory
- Day Trips and Adventures
